

## **Matrix Design, LLC is Exhibiting Innovative Automation Solutions at 2019 Motion + Power Technology Expo**

**Bartlett, IL [September 26, 2019]** – Matrix Design, LLC will be exhibiting at the Motion + Power Technology Expo (MPT) from October 15 - 17, 2019 at the Cobo Center in Detroit, MI. Held every two years, The MPT Expo hosts manufacturers from the mechanical and gear power, electric power, and fluid power industries.

“We’re looking forward to being at this year’s show where attendees will have the opportunity to see the latest advancements in automation technology,” says Jeff Bennett, Vice President of Sales and Marketing. “We’re thrilled at the opportunity to present and discuss our world class robotic automation systems to manufacturers looking to improve their operations through increased productivity, improved safety and work environment, decreased costs, and consolidation of processes.”

Matrix will exhibit in booth #4022 and will feature live automation demonstrations of their robotic material handling systems. Matrix’s experienced staff experts will be in attendance to present their systems and to consult with attendees.

### **About Matrix Design**

Few manufacturers can do automation on their own. They need an expert partner to help them design high ROI robotic automation projects, get them funded, implement successfully, and keep them running for years. Matrix Design helps manufacturers get automation done right—and guarantees success.

Specializing in machine tending, deburring, and a range of material handling systems, Matrix has built a reputation for designing and delivering the most optimal and robust industrial automation systems to manufacturers worldwide.
