Easier Inspection of Internal & External Splines with New Horizontal Slide Option

Looking for a super-efficient solution for high volume spline inspection? Check out this new development from Frenco GmbH, world leader in spline metrology. Introducing a new horizontal slide option for the inspection of internal and external splines with AVM and IVM gaging systems. Advantages of this new development are the easier handling of long workpiece shafts through adjustable V-blocks with longitudinal travel; and repeatability for Mdk averages of $\leq 1.3 \mu\text{m}$. View a demo.

Frenco GmbH has been in the spline metrology business since 1978. Euro-Tech Corporation is the exclusive North American distributor of Frenco splines and gears.

Euro-Tech Corporation has represented unique German-engineered gauges; tooling products such as arbors, chucks, measurement systems and accessories; since 1993.

Workholding & gaging solutions since 1993
